

Black is DDI4 Object
 (Red is term in Dan and Jay's paper)

Comments:

1. Barry and Steve felt the relationships should be to the Capture object rather than the Question object
2. Observation appears to have both a "conceptual" and "Instance" characteristic here. Is this an issue?
3. Relationships from ProcessStep and InstanceVariable are not yet in Drupal (these are frozen during modeller review as of 4/3/2015)
