

Web Site Maintenance Group Report 2012/13

Submitted by Olof Olsson, Chair

The group maintains the DDI Alliance Web site, which is built using the Drupal content management system, and adds new content as appropriate.

Group Members

- Olof Olsson, Chair

In October 2012 I took over the position of Web Site Maintenance Chair for the Alliance. Since October the page for presentations has got a lot of new content from conferences that took place in 2012 and 2013.

Michael Iannaccone at ICPSR has added the module “Web File Manager” to make it possible for users to better organize and manage uploaded files.

There are currently no plans for improvements or additions on the Alliance Web page. We need to collect ideas for the future of the site. Please feel free to discuss this with me at IASSIST or contact me directly on olof.olsson@snd.gu.se
