Type	Use case	Checklist
DDI-C	A one-shot study	☐
	Providing study-level information	☐
DDI-L	Reuse questions	☐
	Define relationships between items	☐
	Consistent metadata management	☐
	Use of concepts	☐
	Version questions	☐
	Provenance questions	☐
	Reuse of code lists	☐
	Document variables which are common between studies	☐
	Manage variables which are common between studies	☐
	Support same question in different languages	☐
	Harmonise variables	☐
	Document the flow of a questionnaire	☐
	Manage and document data over time	☐
	Track which organisations are creating data	☐
	Interchange of information with other standards	☐
	Document hierachical datasets	☐
	Assign concepts to individual variables	☐
	Create common specification for questionnaires in different modes	☐
	Document the response to a scale (0-100) on a line in a question	☐
	Document a response to clicking on an image in a question	☐
	Manage geographic areas over time	☐
Both	Use controlled vocabularies	☐
	Structure	☐
	Interchange of information	☐
	Document dataset in different formats	☐
	Differentiate between substantive and sentinel domains (valid and missing values)	☐
	Create groups of variables	☐
	Document which question a variable was created from	☐
	Consistent discovery of	☐
	Document variables in a dataset	☐
	Document the universe (who is being asked a specific question)	☐
	Extend the functionality of Dublin Core	☐
	Document derivation of variables	☐
	Capture quality statements	☐
	Document rectangular datasets	☐
	Describe NCubes	☐
	Create a codebook / data dictionary (for end-users)	☐
