

# Introductions

- **Name**
- **Where you work (name, city, country)**
- **In 20 words or less**
  - | What you do

## Exercise 1

- As a researcher, what metadata do you *absolutely* need?
- How do you want it to *streamline* your research?
- What metadata would you like to have, if it is available, but it is *not integral* to your research?

***10 minutes!***

- ***When or where*** would you like to see metadata integrated into a data lifecycle workflow?
- **What** does research data management have to do with this?

***10 minutes!***
